Health And Safety

Field inspections involve a certain degree of risk. Inspections of wastewater treatment plants, manufacturing plants, laboratories and mines are each associated with various hazards. A safe field inspection depends on the recognition, evaluation and control of hazards. Cal/OSHA regulations and established safety policies are continually being updated. This course/manual has been assembled as a "hands-on" tool for all personnel conducting field activities.

August 31, 2006
8:30 am - 4:00 p.m.
4800 Enterprise Way
Modesto, CA 95356
